PM² ALLIANCE

A comprehensive certification programme.

Open to all. Built around PM².

The PM² Alliance offers certifications for people starting in project management, contributing to project teams, leading projects or teaching the methodology.

The programme now covers PM², its Agile extension, EUPM² for EU-funded projects and SPM² for sustainable project management.

Choose the certification that matches your knowledge, experience and area of practice.

ABOUT THE ALLIANCE

Member-driven and volunteer-led, the PM² Alliance is an international, not-for-profit organisation. It brings together practitioners from institutions, companies and academia to share resources and promote the wider adoption of PM².

OCTOBER 2026 EDITION

CERTIFICATION PROGRAMME

PM² / EUPM² / SPM²

PM² ALLIANCE

NINE CERTIFICATIONS. THREE METHODOLOGY FAMILIES.

Explore the certifications

Choose your next step, from foundational knowledge to advanced practice and training.

PM² Basic Certification

Confirms basic understanding of the PM² Methodology, with emphasis on lifecycle and artefacts. Designed for people participating in projects or beginning their project management journey, including team members, support staff and students.

Explore certification >

PM² Essentials Certification

Validates understanding of PM² governance, lifecycle, processes, artefacts and mindsets. Demonstrates the knowledge needed to contribute effectively to a PM² project team, and provides a strong basis for leading or supporting projects.

Explore certification >

PM² Advanced Certification

Assesses basic and advanced PM² concepts, their relationships and their application across a project. Demonstrates the understanding needed to lead a PM² project effectively or support it from a position of advanced methodological knowledge.

Explore certification >

PM² Agile Certification

Confirms understanding of Agile principles, tools and techniques in PM² projects. Covers Agile governance and lifecycle, values and principles, and the practices needed to integrate Agile effectively into a PM² management approach.

Explore certification >

PM² Trainer Certification

Assesses a trainer's master-level understanding of PM² and ability to explain its basic and advanced concepts. Designed for trainers, educators and coaches who teach the methodology and prepare candidates for PM² certification.

Explore certification >

EUPM² Essentials Certification

Validates foundational knowledge of EUPM² for EU-funded grant projects. Covers the tailored lifecycle, governance, roles and key artefacts, together with the core logic of project design and implementation, from a call for proposals to closure.

Explore certification >

EUPM² Advanced Certification

Assesses the ability to interpret, connect and apply EUPM² in EU-funded project situations. Emphasises governance, detailed planning, artefact interaction, monitoring and control, and methodological decisions throughout project design and implementation.

Explore certification >

SPM² Foundation Certification

Confirms foundational understanding of Sustainable Project Management through PM². Covers PM² governance and the integration of sustainability into the lifecycle, processes and artefacts, establishing a shared language for sustainability-aware project work.

Explore certification >

SPM² Practitioner Certification

Validates practical application of SPM² in real projects. Assesses how candidates integrate sustainability into governance checkpoints, lifecycle management, artefacts and decisions, including the handling of sustainability trade-offs.
